

Mr. Peter Schrum, the Founder and CEO, SUNfarming

Mr. Peter Schrum, the Founder and CEO, SUNfarming was at the University of Nairobi to sign an MoU. The Memorandum of Understanding will see the two collaborate in the areas of energy and environmental matters.

The MOU will promote research in energy and sustainable development, training and development in food and energy, student and faculty exchange, among other issues. In addition, SUNfarming will build a greenhouse on the campus where trainers and students can conduct training and research.

Schrum said that his organization is committed to contributing to university education and research.

The partnership is a culmination of discussions between UoN's Department of Physics in the College of Biological and and Physical Sciences (CBPS) and German based SUNfarming.
